

## Workstation accessories

### Creating flexible solutions for vibration isolation

F01 Frame 120x75 platform size

F02 Frame shelf on AMT-75x75S

F03 Platform guard with F08 arm rest bar and F15 gel rest on AMF-120x75 table

F03 Platform shelf

F27 Keyboard shelf on AMF-90x75S table

F10 Monitor post

F06 Retractable castor

#### A better working environment

Our accessories and options can be used with any of our range of tables and platforms over 60x60cm to improve the environment for your instruments as well as making your work easier. Workstations provide a tailored working environment with vibration isolation built in, making working with sensitive instruments both faster and easier, greatly increasing the reliability of measurements in your laboratory. The platforms are simply bolted onto a standard frame to make a table and the accessories shown attach to the frames either directly or through use of the platform guard option.

#### Accessories

##### F01 Frames

Frames bolt directly to platforms using four bolts. Legs are made from 60mm square steel box section with a hard white epoxy powder finish. A back strut connects the legs together, also made from box section steel. Levelling feet give 3cm of adjustment and tilt to ensure the frames stability on the most uneven of floors. Frames are supplied in a choice of heights, Standard is 70cm and Lab is 85cm

##### F02 Frame shelves

Frame shelves are made from steel and epoxy powder coated white, they are located simply over the frame leg struts

##### F03 Platform guards

The platform guard option features a pair of sturdy rails and a pair of sturdy support bars, which mount directly to the underside of the platforms. The guards mount directly to these support bars, which also feature mounting holes for the active isolation area option, monitor supports and arm rest bars

##### F04 Platform shelf

The platform shelf is 30cm wide and sits directly onto the guard rails. It is quick and easy to remove

F05 is the stainless version of these

##### F06 Castor feet

These castors incorporate a foot which can be raised and lowered by a thumbwheel allowing the workstation to be wheeled around for cleaning or relocation and then securely fixed onto the floor

##### F08 Arm rest bar

The arm rest bar fixes to the front guard rail and is adjustable up and down for user comfort. Either a gel pad F15 or articulated arm rest F16 can be placed on the bar

##### F10 Monitor post

The LCD monitor post bolts to the back guard at position of either the right or left support bar. It has an adjustable multi directional arm that allows the user to place the screen at the height and position most comfortable for use. It will support most standard monitor brackets. They also bolt directly to the AMT table tops (version shown)

##### F27 Keyboard shelf

The keyboard shelf attaches to the base of the platform and is pulled out as required. It measures 50x35cm (WxD) and will accommodate most keyboards

##### F28 Active area worktop

The active area option is available for 120x75 and 90x75 size platforms, it comprises a top plate and two support bars it rests on and an isolation plate which fits into the aperture in the top plate and sits on the platform underneath. It offers the advantage of offering the stability of a large air table without the loss of working area F29 is the stainless version

#### Laboratory solutions

We supply a wide range of associated products such as tables, cabinets and chairs in a choice of surface finishes, which meet stringent lab requirements, this includes stainless steel in a choice of grades, Trespa and powder epoxy. We can also supply custom sizes and shapes to fit virtually any space, allowing users to get the maximum benefit from the space available.
