

Silent Compressor CO1

High Performance air compressor

Type	High performance motor	Output	Tank capacity	Weight/Dims.cms
CO1	0.5hp(0.34kW)	50 litre/min.8 bar	4 litres	18kg/ 32Hx28Wx32D

- Ultra low noise 40dB means compressor is virtually inaudible
- Unique design with piston rings eliminates oil carryover into the air supply
- Proven design widely in use in laboratories worldwide
- Range of models to suit the different voltage supplies currently in use globally
- Meets international standards including UL listing for USA

The combination of a high performance motor and piston rings makes this compressor ideal for use in scientific applications. With noise levels of less than 40dB and almost no vibration it is the best compressor for use with vibration isolation tables. The rings ensure the air is clean and pure and each compressor is fitted with a 10 bar regulator and 5 micron filter as standard. The air output is 6mm push fitting standard or 1/8 BSP if preferred.

Models include: UK version 240Vac, European 220Vac version and USA 115 Vac version.
